***Rates for Vietnamese rice decrease amid the sluggish export activities and the high shipping costs.***

Prices of Vietnamese 5 percent broken rice decreased to 385 USD per tonne, the lowest level since February 2020, from 390 USD per tonne a week earlier. Traders are hesitant to sign new export contracts as they are unsure if they can purchase rice from farmers during the movement restriction caused by the Covid-19 pandemic, said a trader based in Ho Chi Minh City. Also, export activities slowed down because of the high shipping costs.
